Introducing Juggernaut (JGN)

JGN is the decentralized DeFi governance token of the future

Create, run and exchange your own DAO and NFTs:

- NFT compatibility, Marketplace & Exchange
- Binance Smart Chain (BSC) compatible
- Customize your use case and build your own synth
- Dynamically split profits based on performance
- Globally collaborate on establishing project decisions
- Have people fund and engage in innovative new models in the JuggersWAP marketplace

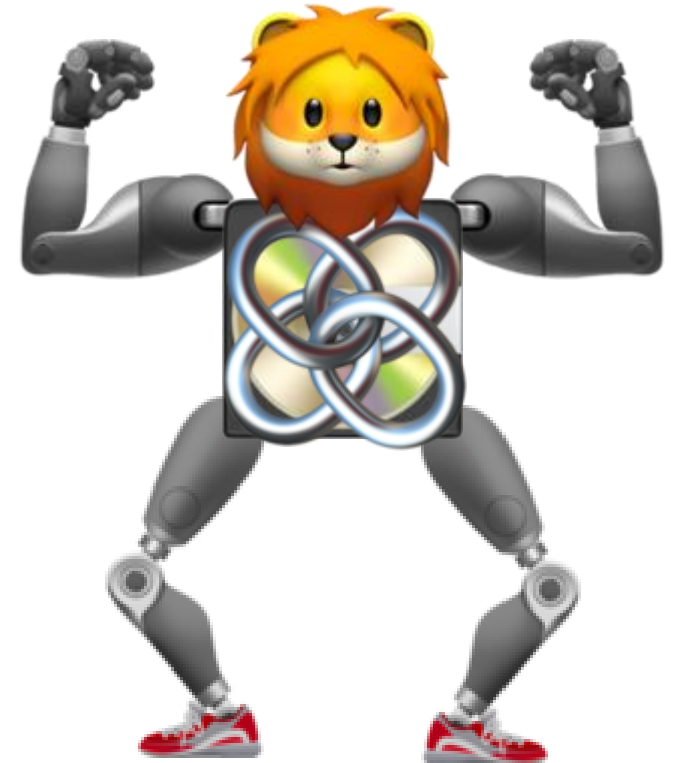

Proud partner of:

Delivering Freedom of Assets

- Juggernaut is a complete custom DeFi synthetics suite, governance, and NFT ecosystem + marketplace.
- We focus on the emerging non-commodity, custom DeFi synthetics + NFT market.
- We are transcending the traditional finance industry to enable the creation of new and innovative assets and making them accessible for everyone.

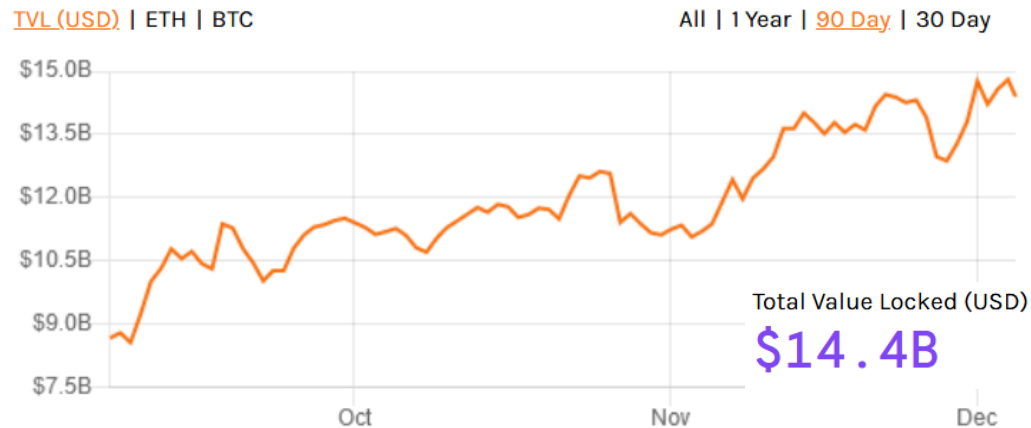

DeFi and NFTs Have Changed Everything

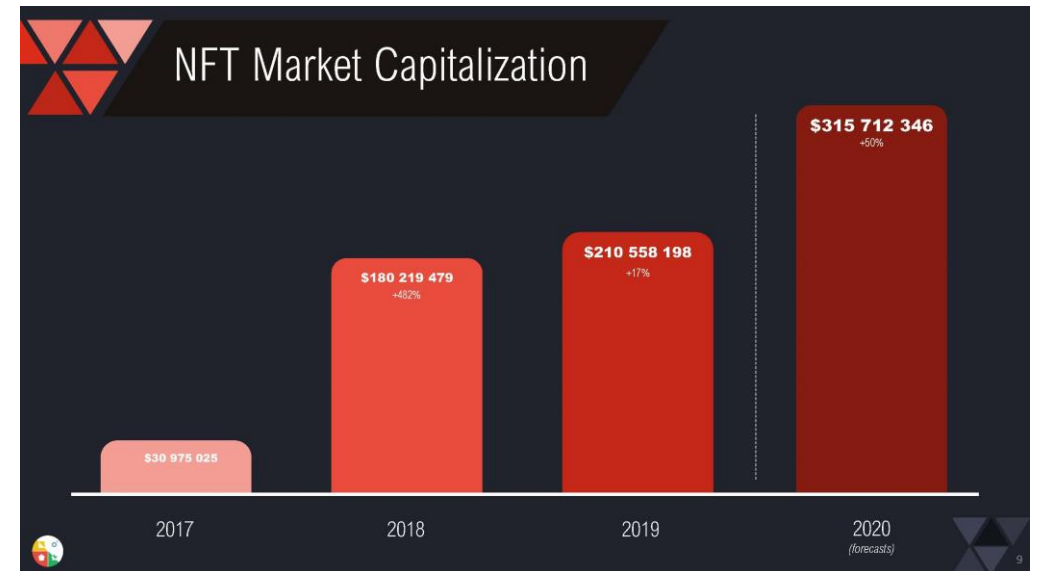

DeFi, short for decentralized finance—is the notion that crypto companies can recreate traditional financial instruments in a decentralized architecture, outside of companies' and governments' control.

A non-fungible token (**NFT**) is a special type of cryptographic token which represents something unique; non-fungible tokens are thus not mutually interchangeable. This contrasts with cryptos like bitcoin, and network or utility tokens that are fungible in nature.

Roadmap

Juggernaut (JGN) Roadmap

December 2020

- Launch JGN tokens on the Binance Smart Chain (BSC)
- Release our first Exclusive NFT Collection on BSC, featuring a new lottery system for NFTs
- Launch the first interoperable NFT Marketplace on the Binance Smart Chain, using BNB to unlock exclusive content and NFTs

Proud Partner of:  **BINANCE SMART CHAIN**

Why Binance Smart Chain (BSC)?

- We created Juggernaut to help everyone be part of the NFT + DeFi revolution and get exposure to new and interesting asset classes and innovations.
- Our mission is to make DeFi and NFTs accessible and simple for all.
- When we were looking for potential ways to expand Juggernaut, we always had interoperability in mind.
 - While we think the ETH network is great, NFTs do not belong only to one chain, they should be accessible for everyone.

 So the next Uniswap alt for me here is [\\$JGN](#)

It dropped after liquidity was added so a nice discount from previously over \$1

Partnership with [\\$SKM](#) and could be a nice defi project

As always dyor - small cap alts are highly volatile
